

Alu Concerto

Step systems made of platforms for choir and concert events

Platforms in the modular system are put together to suit the size of a choir or orchestra.

Can be expanded or reduced at any time, suitable for the event location.

Space-saving storage.

Plug-in-foot or scissors-type platforms, which are set up in straight or semicircular step arrangements for choir and concert performances.

KLEU[®]

Alu Concerto

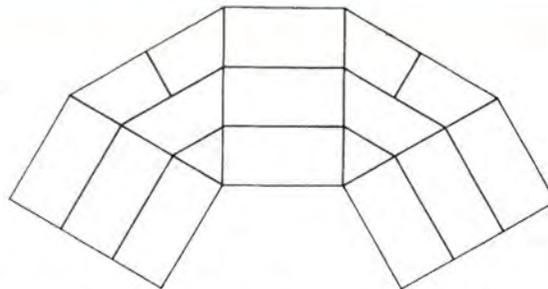

Step system in a straight structure with height increments of 40 cm and stair elements between the steps.

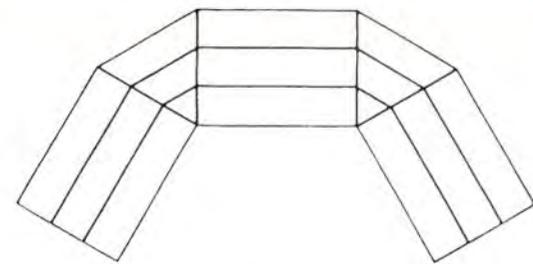

Picture above: system as on the right with textile facing to cover the feet.

The formations on the right show possibilities of construction with platforms in special dimensions for semicircular construction.

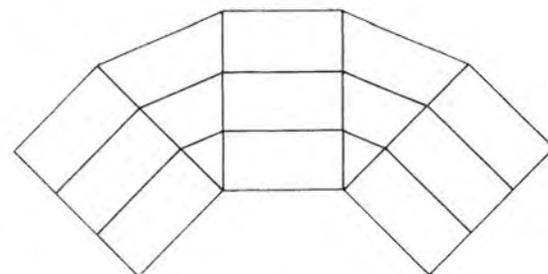

Width: 9,2 m; Depth: 4,7 m, Opening Angle 120°

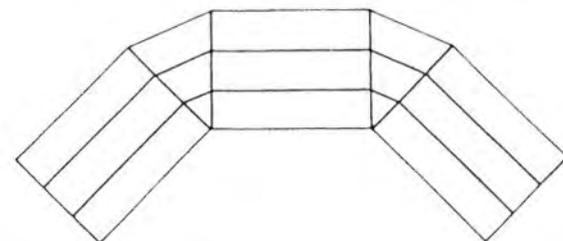

Width: 6,2 m; Depth: 3,2 m, Opening Angle 120°

The pictures on the left are with platforms in the standard size 2 m x 1 m. The pictures on the right with platforms 2 m x 0.5 m.

Width: 9,1 m; Depth: 4,5 m, Opening Angle 135°

Width: 7,0 m; Depth: 2,9 m, Opening Angle 135°

A number of singers can always be placed in front of the step structure.

Alu Concerto

Benches for choir platforms

Existing of steel black epoxied frame with an 18 mm thick seat made of lacquered multiplex board in brown or black, bevelled on all sides.

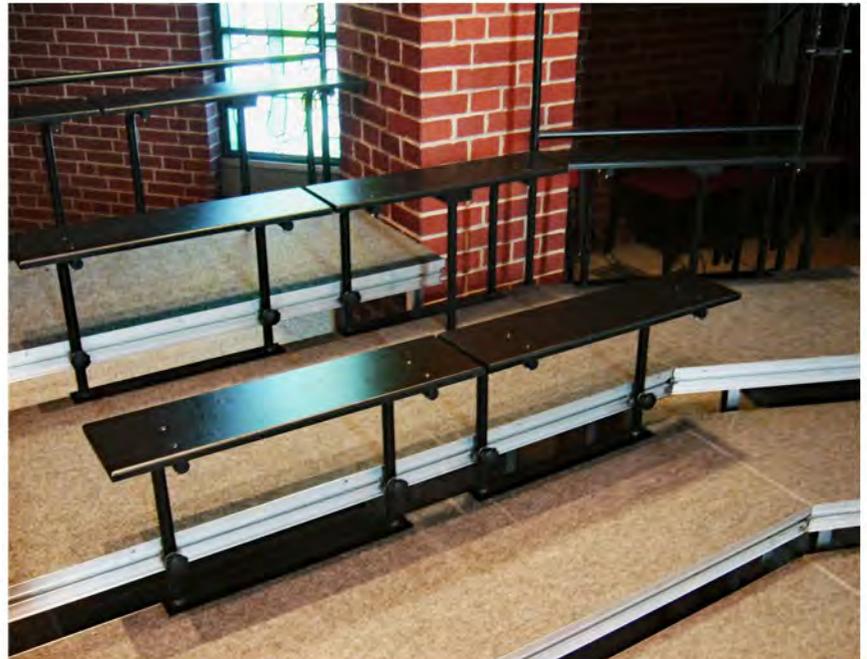

The benches are attached to the next higher platform. The last row of benches is attached separately because the next higher row is missing.

Construction examples

Above: last row of benches installed

Right: 3 rows of benches installed
