

Alu-Funktional

Variable multi-purpose platform system
for workshop, assembly and shipping

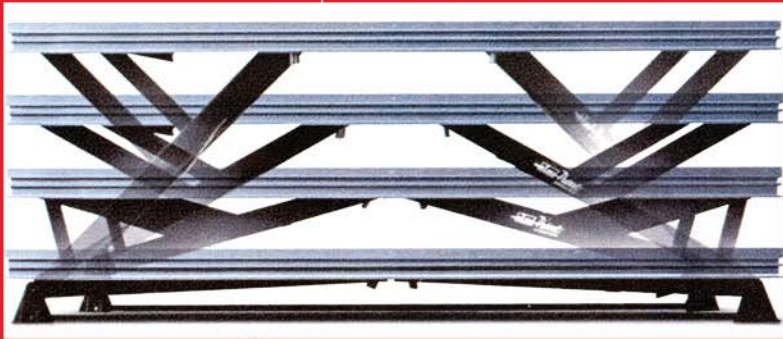

Ideally suited for the design of work stations in variable sizes, formations and heights.

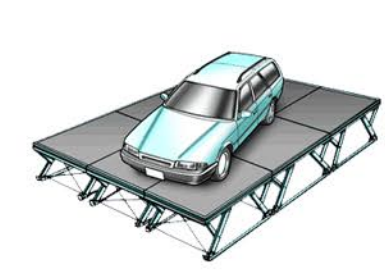

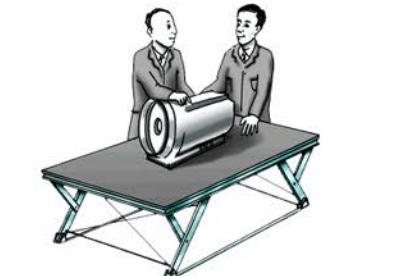

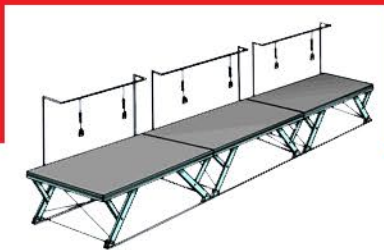

One-hand scissors-adjustment enables 5 different heights from 20 - 100 cm as well as ramp construction. Heavy-duty aluminum frame construction with insert plates of all kinds, for example wood (on request water- and oilrepellent), grating, PVC, metal, aluminum sheets etc.

The aluminum frame is equipped with an integrated groove for the quick and stable connection of several elements with one another and for attaching accessories.

KLEU[®]

Special advantage:
 Each system can be expanded, reduced,
 converted or stored folded
 Standard dimension: 2 m x 1 m
 Load capacity: 7.5 kN / m²
 Special dimensions and equipment available.

Numerous possible uses are conceivable: as a series structure for series production, as a practical arrangement for shipping and packaging, storage space for series assembly, work platform for operational test facilities, as a presentation area for samples, prototypes and exhibits, as an exhibition platform for cars, machines etc.
