KLEU[®]

Technical Details

Size 950 mm x 950 mm

Storage height 26 mm

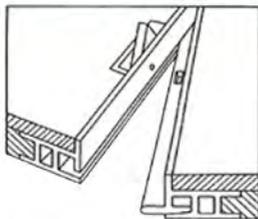

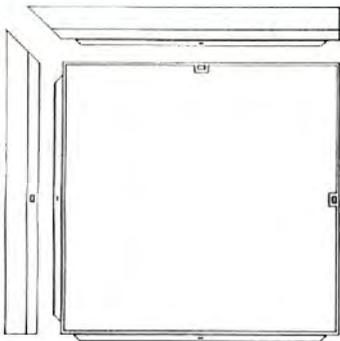

Weight 18 kg

Material Oak parquet

Friezes Alu gold- or silvercoloured

The connection in the tongue and groove system with locking mechanism holds the floor elements absolutely stable together. The back of the floor elements is equipped with an anti-slip covering - an additional carpet stop prevents the surface from "wandering" on, for example, deep-pile carpets. The parquet flooring (natural oak) is lacquered as standard - special colors on request.

Oak with polished surface. Universally interconnecting floor elements. Aluminium friezes for protection and longevity. Efficient interlocking by groove and over centre cam fastening which will not disengage during use. Tapered Aluminium edging for strength and safety. Transport trolley for 30 floor elements and accessories.
