

Open Air Stage

Roof construction with tarpaulins

for outdoor events

Equipping a stage area with support posts and tent roof construction, including side / rear wall.

The access to the open-air stage can be made from the back with a recess in the tent wall or from the front.

After the support and roof structure has been installed and the tarpaulins for the roof and sides have been attached, the roof structure is brought into position using 4 hand winches.
